

## QAPP CERTIFIED PRACTICE QUIZ: COMBINED CERTIFICATE E FLEXIBLE ENDOSCOPY FOR SPEECH-LANGUAGE PATHOLOGISTS

This form is used by the College's Quality Assurance & Professional Practice (QAPP) Committee as part of the QAPP Program module for Certified Practice (CP).

The form, and related video viewable from the [Certified Practice page](#) of the CSHBC website, relate to voice objectives for the new combined CP Certificate E.

### REGISTRANT IDENTIFICATION

<b>Registrant Name:</b>	<b>Profession:</b>
	Speech-Language Pathology
<b>Email Address:</b>	<b>Registration Number:</b>

### QUESTIONS

<b>Q1. A physical exam should directly inspect oral, facial, and velopharyngeal structures.</b>	<b>TRUE</b>	<b>FALSE</b>
<b>Q2. A flexible endoscope offers assessment of part of the upper vocal tract.</b>	<b>TRUE</b>	<b>FALSE</b>
<b>Q3. Endoscopy is used to assess the physiology and function of velopharyngeal, laryngeal, pharyngeal, and respiratory structures for the purposes of speech, voice, and swallowing.</b>	<b>TRUE</b>	<b>FALSE</b>
<b>Q4. Speech-language pathologists provide the medical diagnosis based on the endoscopy examination.</b>	<b>TRUE</b>	<b>FALSE</b>
<b>Q5. Risks of endoscopy may include, but are not limited to: allergy or intolerance of topical anesthetic or nasal decongestants; vasovagal syncope; patient discomfort; epistaxis/nose bleeding and laryngospasm.</b>	<b>TRUE</b>	<b>FALSE</b>

Q6. <i>Topical anesthetic is not routinely needed for an endoscopy voice examination.</i>	TRUE	FALSE
Q7. <i>Endoscopy can be used as a biofeedback tool.</i>	TRUE	FALSE
Q8. <i>Abnormal laryngeal postures (e.g., posterior gap; bowed vocal folds; ventricular/aryepiglottic positions) never mask or imitate structural features.</i>	TRUE	FALSE
Q9. <i>There are five (5) muscles which give the actions of the soft palate. They are innervated by the facial nerve.</i>	TRUE	FALSE
Q10. <i>Saying "Puh puh puh puh puh" and counting from 60 to 70 are examples of low-pressure phonation.</i>	TRUE	FALSE
Q11. <i>Asking clients to do the same tasks more than once provides better information.</i>	TRUE	FALSE
Q12. <i>You should <b>NOT</b> fatigue your client if you want to obtain an accurate presentation on the study.</i>	TRUE	FALSE
Q13. <i>Laryngeal structures during quiet breathing should be observed for a minimum of three (3) complete breath cycles (i.e., inhalation and exhalation).</i>	TRUE	FALSE
Q14. <i>Vocal fold edges are difficult to evaluate with continuous light.</i>	TRUE	FALSE
Q15. <i>Flexible endoscopy does not allow you to have a client talk, sing, and/or sustain sounds.</i>	TRUE	FALSE
Q16. <i>Recording the study is helpful so you can review it later and do not have to decide what you are observing 'in the moment'.</i>	TRUE	FALSE

Q17. <i>Granulomas are associated with reflux and are always unilateral.</i>	TRUE	FALSE
Q18. <i>The pathway for the vagus nerve is from brain stem larynx and the right and left recurrent laryngeal nerve pathways are symmetrical.</i>	TRUE	FALSE
Q19. <i>An <u>Essential Voice Tremor</u> is typically classified as Slow Hyperkinetic Dysarthria.</i>	TRUE	FALSE
Q20. <i>During endoscopy, you do not need to listen for: voice arrests (preceded by struggle/breathiness ... ); periods of strained-strangled voice (ADDSD)/periods of aphonia (ABDSD)..</i>	TRUE	FALSE
Q21. <i>Speech-language pathologists should look for: glottic and supraglottic hyper-adducting (ADDSD)/hypo-adducting (ABDSD) features as well as extraneous gestures (e.g., facial, breathing).</i>	TRUE	FALSE
Q22. <i>Infectious/inflammatory conditions have a variety of etiologies including viral/bacterial infections, autoimmune disorders such as lupus and (rheumatoid) arthritis.</i>	TRUE	FALSE
Q23. <i>“Muscle Tension Dysphonia” includes muscle misuse patterns related only to psychological stress factors.</i>	TRUE	FALSE
Q24. <i>Abductor laryngospasm features breathy voice-aphonia/possible coughing/choking.</i>	TRUE	FALSE
Q25. <i>Adductor spasm features difficulty breathing in/possible coughing/choking. Be ready with instructions to break spasm (i.e., sniff; pursed lips breathing, breathing through a straw).</i>	TRUE	FALSE
